Main / General Courses	Organization and management theory, operations management, strategic management, marketing management, financial management, accounting for managers, economics principles, management information systems, human resource management, organizational behavior, decision making for managers
Specialized Courses	Supply Chain Management, Inventory and Warehouse Management, Service Operations Management, Business Dynamics, Operations Strategy
Program description / objective	<p>The two-year MBA program in Operations and Supply Chain Management includes 14 course modules (core and optional) and a 35000-45000 words thesis. In the face of global disruptions, e.g. pandemics and wars, increasing complexities and constantly evolving technologies, the role of logistics and supply chain executives becomes more critical. Upstream and downstream members of the supply chain need to cooperate with each other to sustain and strengthen their competitive position by creating value to the ultimate consumers in terms of producing and delivering products and/or services. The aim of this MBA program is to develop an in-depth understanding of how supply chain operations and processes are linked to business strategy.</p> <p>Along with mastering logistics and supply chain management, the students will deepen their understanding of the practice's relationship with other organizational functions such as human resource management, finance, marketing, strategic management and quality management. The students will implement the supply chain concepts</p>

	<p>and techniques through consulting projects, coursework projects, case studies and their MBA thesis.</p> <p>The graduates can pursue a career in manufacturing and service industries in roles such as logistics manager, supply chain manager, supply chain consultant, supply chain analyst, purchasing manager and warehousing manager.</p>
